Mymensingh, Bangladesh

SUMMARY

Final year Software Engineering Student with expertise in MERN stack Web Development and WordPress, along with strong communication and problem solving skills. I aim to explore opportunities across R&D, Commercial operations, Supply chain management, Project coordination and other business related functions, where I can combine my technical expertise and industry experience to drive business growth and operational efficiency

SKILLS

Technical Skills :

- React.js
- Next.js
- Node.js
- Express.js
- MongoDB
- Mongoose
- JavaScript
- WordPress
- HTML5
- CSS3
- Tailwind CSS
- REST API
- JWT
- Git/GitHub

Soft Skills :

- Communication
- Problem Solving
- Teamwork
- Project Coordination
- Analytical Thinking
- Adaptability

LANGUAGES

Bengali

English

EXPERIENCE

Golden Vault, Junior Web Developer

11/2024 – 02/2025 | Dhaka, Bangladesh

- Integrated modern web technologies (e.g., HTML5, CSS3, Tailwind, JavaScript, React, Next JS, Mongoose, OAuth) to improve performance and optimize the website for various devices and browsers.
- Collaborated with cross-functional teams to design and implement new features, enhancing the platform's functionality and usability.
- Developed and implemented secure user authentication features, including login and registration, ensuring data protection and a smooth user experience.
- Built and integrated the forum section of the website, enabling users to create discussions, post comments, and interact with other members
- Designed and set up the database schema to store user and forum data, ensuring data integrity, scalability, and efficient queries.
- Assisted in troubleshooting, debugging, and optimizing code, ensuring high performance and scalability.

PROJECTS

Food Share BD,

FoodShareBd connects restaurants, hotels & markets with NGOs — turning food waste into real impact across Bangladesh

- Developed backend and full responsive frontend
- Implemented authentication with JWT
- Implemented role based login system
- Integrated map based product filtering
- Implemented area based notification system
- Implemented interactive admin panel
- Technologies used: MongoDB ,Next JS , JavaScript , Firebase

Studio Patsons Limited (Project of ByteBlooper)

A leading manufacturer of high-quality textile products, committed to excellence and innovation in fabric design and production 

- Developed full responsive frontend with ByteBlooper as tech lead
- Integrated category based products filtering
- Developed admin panel
- Implemented add to basket and Submit Inquiry
- Integrated Django backend with the frontend
- Technologies used: React ,Tailwind , Shadcn,CSS , Javascript

Al Jawhar Academy,A Reliable Online Platform for Learning the Holy Quran

- Developed a responsive, multilingual platform tailored to client requirements for effective Quran learning.
- Integrated seamless Google Sheets API to automatically record client data and trigger instant notifications to both the admin and the client.
- Enabled real-time communication through WhatsApp messaging integration.
- Technologies Used: React, JavaScript, Google Sheets API, Tailwind CSS, HTML, CSS.

Archean (Nasa Space App Competition),

Developed and deployed the Archean project website as part of the NASA Space Apps competition, focusing on creating an engaging and interactive user experience

- Implemented Gemini, a conversational chatbot, to assist users in navigating the site and providing real-time information related to space exploration and research.
- Integrated dynamic features with a visually captivating globe background to enhance the website's interactive and educational aspects. WEB DEVELOPER
- Collaborated with team members to design and develop a scalable, responsive website
- Technologies used: Next Js, Mongodb ,React, JavaScript

Shuktara Biddya Niketon, Full-Stack Educational Platform

- Developed a fully responsive, cross-browser compatible educational platform, ensuring high performance and an optimized user experience across all devices.
- Created dedicated routes and forms for batch-wise alumni registration, teacher onboarding, and result and notice management, enabling organized content delivery and role-based data access.
- Implemented dynamic sections to visually showcase the school's heritage, achievements, and past student records, highlighting the institution's legacy and academic excellence.
- Designed and structured scalable MongoDB schemas with Mongoose to manage data for users, teachers, results, notices, and forum discussions, maintaining data consistency and performance.
- Built secure jwt based user authentication supporting smooth login/registration workflows and safeguarding user information.
- Built an admin portal to control all the things

DECLARATION
